

#1 Lynn

- ☐ If I do fact checking on my laptop, I would like to have an interface, like Cortana, to see the interaction and result as a conversation between the software and me.
- ☐ I use a video website like youtube and Bilibili to get information or just having fun. So if the extension could automatically run when I open those websites would be good.
- ☐ I'm more interested in celebrity news and scientific documentary.
- ☐ If I'm wearing my headphone when I watching a video, what would happen?

#2 Brent

- ☐ I like to watch Trevor Noah.
- ☐ I like this idea. It would be helpful for fact-checking, but I probably wouldn't download this by myself.
- ☐ I'm not very into politics since I care more about the things I could do.
- ☐ I prefer to do fact checking when I see some article, video or others related to science and biology. (His major is BME.)
- ☐ I think the google chrome extension is acceptable for me.
- ☐ I'm currently using some google widgets on my laptop for search discount and grammar checking.
- ☐ My concern is the background noise is loud in some circumstance like now. (the garage workspace)
- ☐ I expect the widget could automatically run when I open a certain topic like biology. It may be able to check the title of video before.

#3 Bea

- ☐ I love this and the interface is easy to use.
- ☐ My only concern is the checking result "This is not true." I think "It seems like there is no source could support this statement" would be better.

#4 Bradley

- ☐ Could I check the last two sentences?
- ☐ I think I'm a little bit curious about the transparency.
- ☐ I would like to know the mechanism behind this application.
- ☐ If this result and the content are generated by editors, I would like to know the source or the tendency of the editors?
- ☐ If possible, I may also want to have an option to check the fact after I finish watching the whole video.
